

Dan Stolts

Founder & Chief AI Officer, Just In Time AI

I turn AI into products that ship, and into governance an executive team can trust.

Microsoft Press books on architecting Azure solutions

750-800

technical posts across 17+ years

~13 weeks

from first commit to live paid checkout on a new product

Summary

30+ years in enterprise technology: a decade as the face of Microsoft in the Northeast US, two Microsoft Press books on Azure, and Azure itself, which I still use every day. Today I ship governed AI products at Just In Time AI, including a security-scan engine behind two live products and a new product launched in about 13 weeks.

Experience

Just In Time AI (formerly JitSolutions)

2022 to present

Founder & Chief AI Officer

After Microsoft, I returned full time to JitSolutions, my own company, and rebuilt it as Just In Time AI. I lead product, platform and delivery across AI field support, a marine service product, security and a shared platform.

- Shipped a voice-first AI repair platform that works offline in the field, with enterprise sign-in and every release verified.
- Launched a second product in about 13 weeks, first commit to live paid checkout, on the first product's platform.
- Built one scan engine behind two live products; the security product maps findings to CIS v8, NIST CSF and CMMC.
- Runs multi-agent AI delivery under governance, so every result is repeatable and traceable.

ITProGuru

Publishing since 2008

Author and publisher

- Built a technical-education practice: about 750-800 posts over 17+ years on Windows Server, Hyper-V, Azure, PowerShell and DevOps, and since 2025 applied AI.
- Co-authored two Microsoft Press Exam Ref books on architecting Azure solutions, in 2015 and 2018.

SKILLS

- AI product and platform architecture
- AI governance and risk
- Security and compliance (CIS, NIST CSF, CMMC)
- Azure and cloud architecture
- Multi-agent AI delivery
- DevOps and release automation
- Windows Server, Hyper-V and virtualization
- PowerShell and automation
- Reliability and test-driven delivery
- AI discoverability (AEO)
- Public speaking and teaching
- Technical writing

BOOKS AND PUBLISHING

Exam Ref 70-534: Architecting Microsoft Azure Solutions
Microsoft Press, 2015

Exam Ref 70-535: Architecting Microsoft Azure Solutions
Microsoft Press, 2018

Microsoft

June 2008 to 2022, about 14 years

Chief Technology Strategist / OpenHack Technical Owner

- The face of Microsoft in the Northeast US for a decade: technical evangelist and blogger, setting customer and community strategy for IT executives and engineers from New York to Maine. Founded two non-profit tech communities and grew user-group attendance by over 200%.
- Built a free Azure certification program taught by senior Microsoft engineers. Most of the first seven events sold out in two hours, and it went worldwide in January 2018.
- Redesigned technical training events as small, hands-on classes of 80 to 100. Each cost little more than the food, and lab guides lifted effectiveness to 80-92%.
- Cut a university classroom lab's setup from 12 days to 4 hours, and a customer's time to a production release from 18 months to 6 weeks.

Bay State Integrated Technology	Founder and owner	2003 to present
---------------------------------	-------------------	-----------------

Compulan Sales Information Systems

VP Information Systems and lead systems architect	1999 to 2003
---	--------------

EDUCATION AND SERVICE

Bachelor of Science, Business Management

University of Phoenix, 2014

Associate degree, Computer Science

Hawaii Pacific University, 1991

U.S. Army veteran, 1987-1991

Desert Shield; 25th Infantry Division, Hawaii

SPEAKING AND TEACHING

AI Community Conference - Boston

November 13, 2026

My next talk.

Live events

100+ on Azure, 100+ on hands-on labs

I speak all the time, for IT executives, engineers and developers.

Guest instructor

NEIT, Harvard, MIT

Guest instructor, live classes at the New England Institute of Technology (cloud, Azure, leadership, security), Harvard and MIT (Azure and technology). Never on staff; every class was a guest spot.
